## DETAILED ACTION

### *Priority*

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Kato et al. (Kato) (US 6,631,495).

With regard to claim 1, Kato discloses a print system (Figure 1) comprising a computer (personal computer 2-1 and 2-2) and a printer (network printer 4) connected directly or indirectly vi a network (network 3) to said computer, said printer comprising an archive (registration server 1) for storing documents prepared by said computer (col

5, line 11 – col 6, line 23); and a page/document layout section (image format section 87) for performing page/document layout processing for each stored document and outputs document data undergoing page/document layout, provided by the page/document layout section (col 8, line 55 – col 9, line 3).

With regard to claim 2, Kato discloses wherein a user selects and specifies print, storage, or print and storage from said computer as an output destination of the document data undergoing the page/document layout and said printer executes print, storage, or print and storage as specified by the user (col 9, lines 12-43).
